1.9) What was good about the course?

The lecturer explain the material clearly and understandable.

Actually, this is the best course in the UoG. The course content and lecture notes are well-structured. To be specific, the notes gives me a very good intuitive understanding of the content. ~~The~~ In addition, the situation in the Lab module are exactly the same: Good structure, very practical content and very detailed ~~notes~~ notes.

I am really satisfied with this course. The lecturer is fantastic - the best lecturer I have had at the University of Glasgow. The course is perfectly structured and gives a clear understanding when, where and how you use the knowledge in my academic/professional career.

I am not able to understand ~~any~~ much in Basic Econometric. I took this course to give me more time to learn about econometric skill. This course able to give me that and even make me understand a lot of ~~the~~ thing that I was not understand in Basic.

Everything. The lecturer slides are very clear to understand, unlike ~~other~~ some other courses, which purely the publisher's slides! I can see the lecturer puts time and effort into the teaching materials and notes. He explain things quite well, without going off tangent.

- I'd recommend this course to anyone who doesn't understand

The professor explained the contents in a patient and impressive way and really motivated our interest to learn. Also the note for the course is very useful.

The lecture explains and present topics and lectures ~~clearly~~ clearly and ~~thoroughly~~ really helps to for the understanding.

1.10) How could this course be improved?

There is no drawback that can be mentioned.

There are a lot of my friend that not go to this class because afraid that this is difficult but the truth, it is easier than basic to understand.

It's hard for the lecturer to use white-board as they're located in awkward places in the room.

I'd prefer the use of Eviews to Gretl
