1. Student Evaluation

1.9) What was good about the course?

The structure of the course was logical, and the lecturer was fantastic. He was well-prepared for all lectures and can explain difficult concepts in a simple way.

The professor explains the technique concept very clearly and interestingly.

It might be a difficult course somehow, but the lecturer illustrated those contents quite specific and made it easy to understand. Whatmore, he also made it into an interesting and engaging course.

Stimulating us focus on the lecture

well explained, patient to students questioning as well.

Our tutor is very patient and did all well; moreover, the difficult exams drive us have to work hard.

speech part is really nice.

^{1.10)} How could this course be improved?

~~Have~~ Have a ~~assignment~~ project that allows students to apply the knowledge gained instead of a in-course exam.

Longer. ~~More things~~

Already very good.

Some problems could be explained in more details.

Maybe we need more lectures and Lab courses, since the content of this course is quite complicated.

The length of the course could be longer, 10 weeks seem not enough to learn all of intermediate econometrics.

Cannot be better. It is the best.

the course is too basic that can't close the gap with other courses
